

BRACE SET™

Heavy duty bracing anchor for securing the slotted feet of concrete wall panel braces.

BraceSet™ is designed for use at either end of the brace, delivering high tensile and shear capacity, simple installation and clean removal after use.

- Built for precast panel bracing
- Suitable for use at either end of the brace
- Uses a common 30 mm AF hex head socket
- 20 mm drilled hole
- Simple removal with no messy protrusions

**Brace Smarter.
Set Strong.**

16.8 kN tensile capacity

43.4 kN shear capacity

AS 3850.1:2024 compliant
